LinkedIn | GitHub: kratos0718 | GV2023000367 - LeetCode Profile | Abhinav Tarigoppula — AI Engineer & Full Stack Developer

SUMMARY

AI/ML Engineer with hands-on experience building production-grade ML systems, LLM pipelines, and full-stack applications. Proven track record of optimizing model performance and deploying scalable inference workflows. Seeking Software / AI Engineer roles at high-impact product teams.

TECHNICAL SKILLS

Languages: Python, Java, JavaScriptS

AI / ML: TensorFlow, PyTorch, Scikit-learn, LangChain, OpenAI API, NLP, Transformers, RAG, OpenCV, Generative AI

Backend & APIs: FastAPI, Node.js, REST APIs, Vector Databases (FAISS, Pinecone)

Frontend: React.js

Cloud & DevOps: AWS, Docker, Kubernetes, GitHub Actions, Docker Compose

Tools: Git, SQL, Linux, Google Colab

WORK EXPERIENCE

PwC Launchpad Advisory Program (PwC India) - ***AI & Data Advisory Intern*** ***Feb 2026 – Present***

Selected for PwC's flagship program focused on **GenAI, Prompt Engineering, and Data Systems**

- Built and optimized **LLM prompt workflows** for real-world use cases
- Gained hands-on exposure to **enterprise data architectures & AI-driven solutions**
- Achieved **Level 10 | 1500+ XP** demonstrating top performance

Machine Learning & AI Intern | OneStop *AI* ***May 2025 – Aug 2025 | Remote***

- Improved model accuracy by **12%** across 3 production AI projects via hyperparameter tuning and architecture optimization
- Reduced real-time inference latency by **18%** through pipeline refactoring and model-level optimizations
- Engineered end-to-end data pipelines — preprocessing, feature engineering, — processing thousands of records per batch
- Strengthened deployment reliability by integrating monitoring and model performance tracking in collaboration with senior engineers

PROJECTS

PathForge — AI Placement Preparation System **PathForge — Your AI Career OS**

Python, FastAPI, LangChain, OpenAI API, FAISS / Pinecone, React

- Architected a production-grade end-to-end AI placement prep platform leveraging LLM pipelines for dynamic, personalized learning
- Implemented **Retrieval-Augmented Generation (RAG)** with FAISS/Pinecone vector databases — context-aware Q&A and study material
- Engineered intelligent roadmap generation engine analyzing user skill gaps to auto-generate structured learning paths for target roles
- Built LLM-driven modules for dynamic question generation, resume scoring, and mock interview simulation
- Applied systematic **prompt engineering** to improve response accuracy by ~30% and reduce average token consumption per query

Click N Cut — Full-Stack Web Application **Click N Cut - Premium Camera Rental & Editing Services**

React.js, Node.js, REST APIs

- Developed full-stack camera rental platform with optimized state management and RESTful backend communication
- Integrated dynamic workflows enabling real-time availability updates and seamless booking interactions

90-Day DSA Consistency Challenge GitHub | LeetCode: coderboy11

Java, GitHub

- Solved **150+ LeetCode problems** across Arrays, Trees, Graphs, Dynamic Programming, and Recursion — focusing on optimal time/space complexity
- Maintained unbroken GitHub contribution streak across 90 days demonstrating engineering discipline at scale

EDUCATION

Gitam University, Andhra Pradesh — B.Tech in Computer Science & Engineering (AI/ML Specialization) *2023 – 2027*

FIITJEE, Andhra Pradesh — Intermediate (Class XII) MPC *2020 – 2022*
